

1. What is average highest education level of a person ? Mean :16.38, Max. :99.00
2. What is average incomes of a person ? Mean : 14245
3. What is average working hours of a person ? Mean :1235

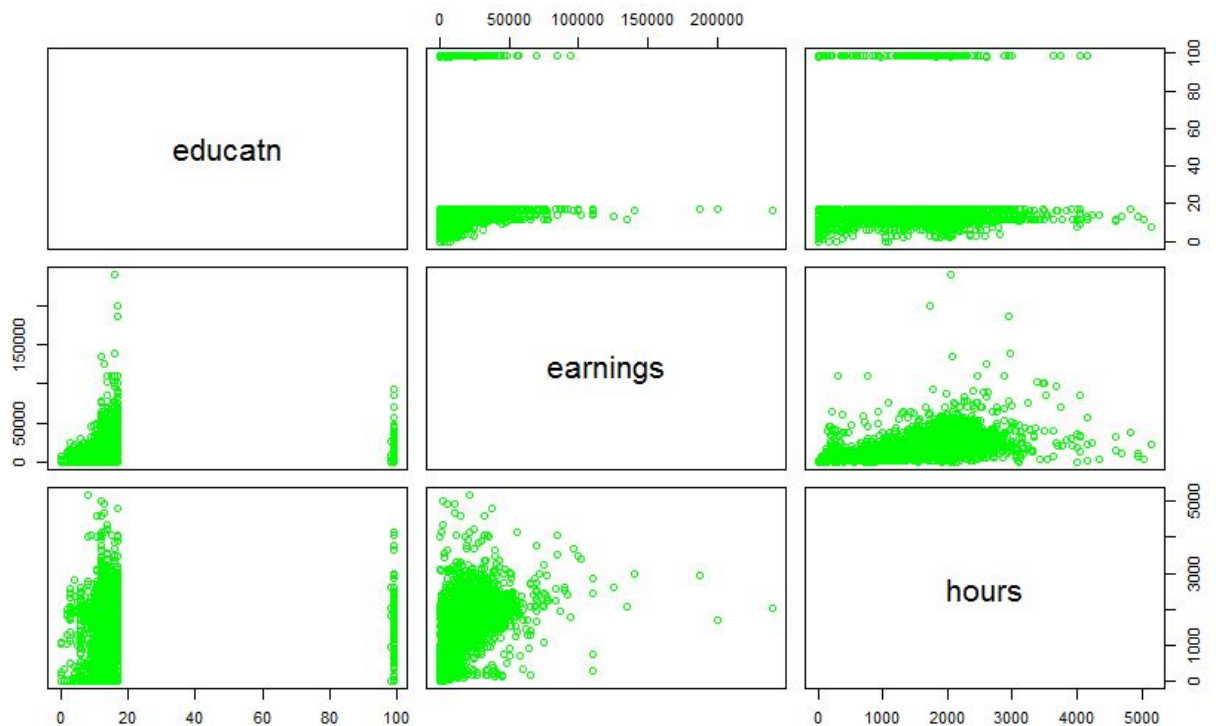

// Correlations

4. Are high educators get more earnings ?

```
par(mfrow=c(1,1))
plot(PSID$educatn, PSID$earnings, col="blue", cex.axis = 1)
```

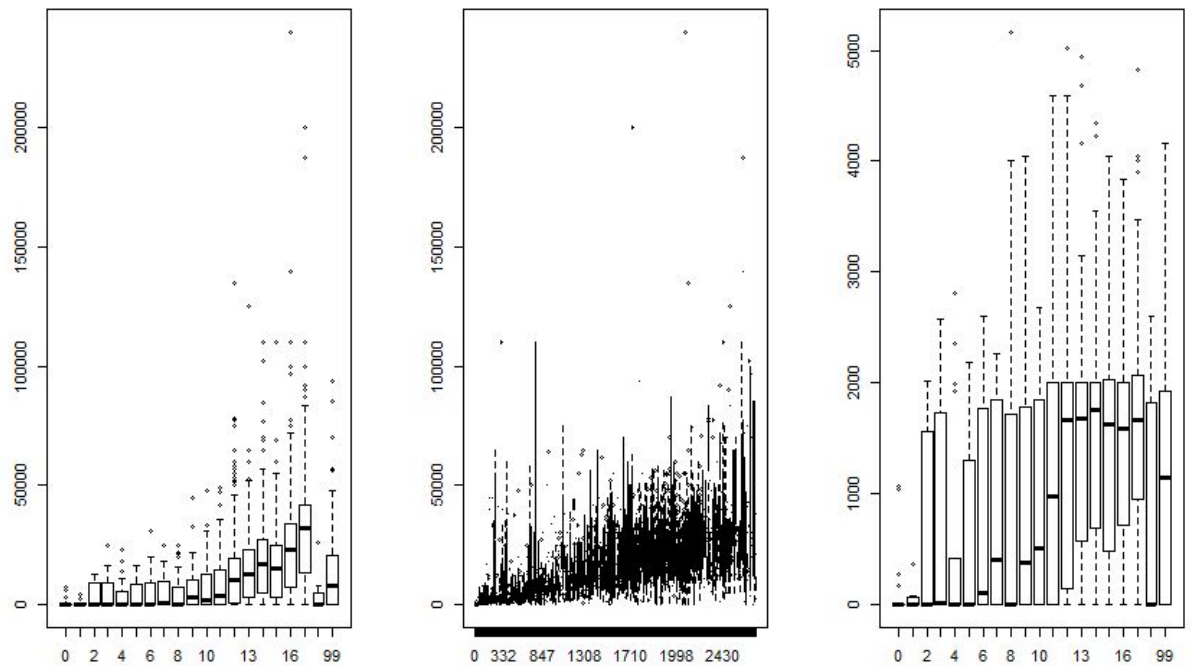

```
plot(PSID[,5:7], col="green")
```

```

par(mfrow=c(1,3))
boxplot(earnings~educatn, data = PSID)
boxplot(earnings~hours, data = PSID)
boxplot(hours~educatn, data = PSID)

```

When education level increased in earnings also increased in Figure 1  
 When number of hours increased, earnings also increased in Figure 2  
 When number of education level up ,number of hours working also increased Figure 3

5. Are high educators all married ?
6. Are married all ones have kids ?

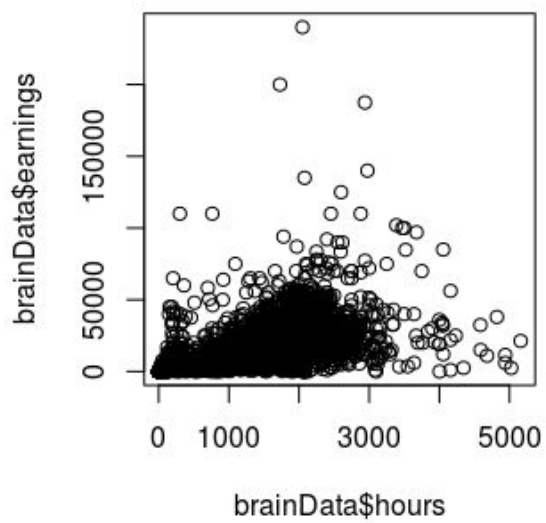

7. Is there correlation between annual working hours and total labor income ?

```
cor(brainData$hours,brainData$earnings)
```

```
[1] 0.6352923
```

```
cov(brainData$hours,brainData$earnings)
```

```
[1] 9618980
```

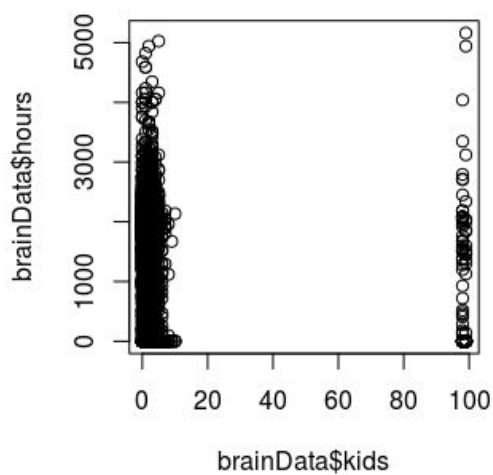

8. Is there correlation between kids and working hours ?

```
cor(brainData$kids,brainData$hours)
```

```
[1] -0.08418643
```

```
cov(brainData$kids,brainData$hours)
```

```
[1] -1187.148
```

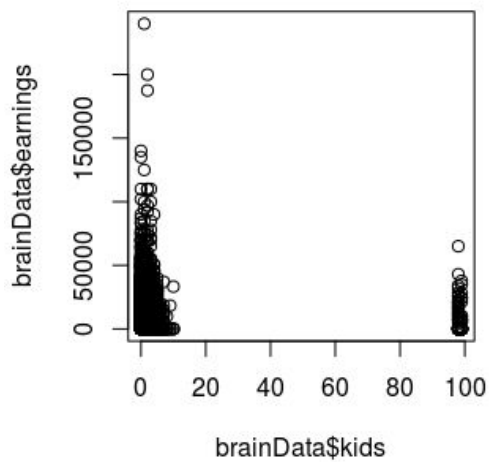

9. Is there correlation between kids and labour income ?

```
cov(brainData$kids,brainData$earnings)
```

```
[1] -0.09078765
```

```
cov(brainData$kids,brainData$earnings)
[1] -21606.47
```

```
// correlation between each of columns
```

	age	educatn	earnings	hours	kids
